

Natural gas.
Energy for the world.
Economic growth for Australia.

The world will need about 30 percent more energy by 2040. Australia's natural gas will play an increasingly important role in meeting this growing demand.

And because gas burns cleaner than other fossil fuels, it also helps reduce greenhouse gas emissions.

ExxonMobil is investing more than \$10 billion in natural gas projects in Australia – helping power economic growth at home and delivering cleaner-burning energy to Asia and beyond.
