"These activities have been designed to ignite curiosity in the next generation."

Spreading a love of engineering

As part of a longstanding partnership with Scienceworks, we sent a team of Mobil ambassadors to assist with the museum's school holiday program. The program explored the concept, 'What is the work of an engineer'.

With a steady stream of families passing through the doors throughout the autumn school holidays, our ambassadors were kept extremely busy running hands-on activities and answering all manners of questions from budding scientists and engineers.

ExxonMobil's Nikki Calcraft said the partnership with Scienceworks was an important part of the broader community relations program for the Altona Refinery.

"We are involved with a variety of local groups in the western suburbs as part of our aim to support the communities in which we operate," she said.

Nurin Veis, General Manager of Scienceworks, said Mobil's support of the holiday program was invaluable.

"These activities have been designed to ignite curiosity in the next generation around the themes of engineering and science, delivered through interactive workshops, lightning room shows, conducting tours of the collection store, pumping station, as well as activating spot talks led by engineering experts."

With so much interest and engagement with these sessions from young children, we can safely say that interest in STEM (science, technology, engineering and maths) fields remains strong and so too does the future of Australian engineering.

You are invited to attend Mobil Altona Refinery's community meeting:

**On Wednesday 6 June 2018
5.30pm to 7.30pm
At Mobil Altona Refinery**

Enter via main reception at Kororoit Creek Rd
Note new security arrangements – use intercom at front door for entry to foyer
Parking is available
Light refreshments are served

Meeting Agenda:

- Refinery Operations
- Environmental Update
- Community Relations Update
- Refinery News

Dates for future meetings:

5 September, 2018
5 December, 2018

About the Community Liaison Committee Meetings

Mobil's Community Liaison Committee meetings are open to all interested people from the local community. Please call Nikki Calcraft on 9261 0834 for more information about the next meeting or if you have any feedback or story ideas for future community newsletters.

Daniel Ricciardo warms up for a race against 10 emerging young racing stars at the Go Kart Club Victoria circuit in Port Melbourne.

"This led to a discussion about the science behind Mobil fuels and lubricants."

Kids keep pace with Ricciardo

In the lead up to the 2018 Australian Grand Prix in Melbourne, Mobil held an exclusive event at the Go Kart Club Victoria circuit with Aston Martin Red Bull Racing's Daniel Ricciardo and Australia's 2018 Grid kids. The aim was to help inspire the next generation of local racing champions.

As part of a press conference where kids played the role of journalists, Daniel shared his goals and aspirations for the season, talked to the Grid Kids about the importance of teamwork and quality fuel and design.

This led to a discussion about the science behind Mobil fuels and lubricants and their role in Formula 1 racing.

The Grid Kids also participated in a time challenge race against Ricciardo whose Kart was awarded to 10 year old Cadel Ambrose who recorded the fastest time... after Daniel of course.

Mobil wishes Daniel the best of luck for the rest of the Formula 1 season.

Altona Refinery completes Jet Fuel Treater expansion

The Mobil Altona Refinery has ticked 'done' on another major project with the recent completion of its Jet Fuel Treater expansion project.

This project involved a team of 40 – including refinery employees, and contractors – working around the clock for 12 days.

Altona Refinery Project Start-up Lead Stewart Burte said that the upgraded Jet Fuel Treater would sustainably increase Altona's jet-fuel production.

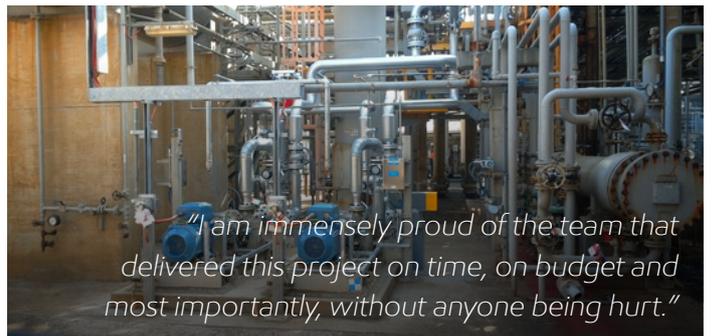

"I am immensely proud of the team that delivered this project on time, on budget and most importantly, without anyone being hurt," he said.

The expanded Jet Fuel Treater complements two major projects nearing completion at the nearby Yarraville Terminal. The Yarraville projects will also make a significant impact on Mobil's local fuel distribution and storage capabilities.

The Yarraville Jet Fuel Pipeline Project will see three kilometres of new pipeline being laid to make distribution of jet fuel from our facility to an increasingly busy Melbourne Airport more efficient. The team at Yarraville Terminal are also working to complete the construction of two new fuel storage tanks, which will increase capacity for jet fuel and unleaded fuel storage.

Altona Jet Fuel Treater Project Executive Jonathan Lawson said these projects, along with the new tanks under construction at the Yarraville Terminal, underpinned Mobil's importance and commitment to Australia's aviation and transport industries and aligned with the Altona refinery's mission of fuelling Victoria.

"With Australia experiencing a growing demand for transportation fuels, it's vital that we are able to scale our operations to fit production that serves the markets we operate in. This is an ongoing priority for our Altona and Yarraville facilities," he said.

"I am immensely proud of the team that delivered this project on time, on budget and most importantly, without anyone being hurt."

New pumps on the Jet Fuel Treater.

Mobil Altona Refinery General Manager

It's hard to believe that it has already been an entire year since I took up the role of General Manager at the Mobil Altona Refinery. Looking at the number of projects we have completed, it seems as though we have packed three years of achievements into one.

Over the past 12 months, we have taken major strides forward in upgrading our capacity and output through the completion of a Pre-Flash expansion project and now our Jet Fuel Treater expansion project. This is one of a number of projects that will enhance our supply of jet-fuel to Melbourne Airport.

We have also increased our capacity to deliver transport fuels of all descriptions, ensuring we are able to continue helping to keep Victoria on the move.

The safe and speedy completion of these projects is testament to the skilled and dedicated team at the Altona Refinery. Everyone carries out their duties with the utmost skill and respect and care for safety protocols as well as each other.

I have also been pleased to witness first-hand the willingness of our people to get out into the local community and support local institutions. This included regular kindergarten and school visits along with sharing engineering insights at Scienceworks as part of our longstanding partnership with the Museum.

I am immensely proud of what we have achieved over the past 12 months and I cannot wait to see what the next year holds in store.

Nurturing bright young minds

"What are those giant candles in the distance?"

Mark Robertson talks to kindergarten children about the refinery.

The Mobil team at Altona are always eager to engage with the local community and in particular with local children who have surprisingly inquisitive minds.

This was evident when the Altona Refinery received a call from a teacher at One Tree Kinder, who was eager to organise a visit from a refinery team member to answer a question many of the kids had been asking: "What are those giant candles in the distance?"

To answer this question, Safety Adviser Mark Robertson visited the kindergarten to talk about what happens at the refinery.

Armed with a bucket full of protective equipment, Mark ran two science focused sessions for the kinder kids including a presentation on how to make jet fuel and what it is that people do at the refinery. Mark also answered a wide range of questions from the kinder kids along with their grade 5 buddies who joined the second session.

Mark looks forward to visiting One Tree Kinder again in the near future.
