Birkenhead Terminal

Birkenhead Terminal is strategically located near the Port River north west of the City of Adelaide, and with easy access to the national rail network and the Port River Expressway.

History and Investments

- Birkenhead Terminal was originally constructed in the 1920s, and has been upgraded several times since. It occupies a 15 hectare site and receives all of its product by ship from refineries in Victoria, Western Australia and Singapore
- Recent investments have included a new 9 million litre diesel storage tank, internal floating blankets on all nine petrol tanks, a state of the art Vapour Recovery Unit, upgraded water treatment system and pipework to optimise tank product allocations

Terminal Overview

- The terminal has five bottom loading bays of which four are used for ground fuels (three grades of petrol and diesel) and one is dedicated to aviation jet fuel
- The terminal has 16 tanks in service with a combined overall capacity of approximately 77 million litres
- The terminal has a rail siding capable of bottom loading eight tank cars simultaneously with diesel; infrastructure is in place to enable the rail siding to be expanded to accommodate 17 tank cars

Operating Details

- Open 24 hours per day, 7 days a week, 365 days per year
- Manned operation: Mon–Fri 08:00–17:00; except public holidays

Facilities

- Driver facilities include:
  - Rest room, showers, mess facilities and vending machines

Product Availability

- ULP, 95 PULP, 98 PULP, Diesel and Jet Fuel
