

Newcastle Terminal

In Newcastle, Mobil has access to both the BP Terminal and the Stolthaven Terminal.

These terminals provide efficient access to the full complement of fuels demanded throughout the region serviced by Newcastle.

Terminal Overview

- **BP Newcastle:**

All products except mineral diesel (diesel without any biodiesel component) will be available from the BP Terminal, located directly off the A43 in Carrington.

- **Stolthaven Newcastle:**

If mineral diesel, without a biofuel component, is required then access is available from the Stolthaven Terminal. Located in nearby Mayfield, Stolthaven is also accessible via A43, then down to Steel Works Rd.
